About Us

Sabre Metals is the region's premier distributor of Acrylic coated AZ55 Galvalume® steel, coated Galvalume and coated aluminum. Our coils and sheets are the preferred choice for downstream manufacturers and distributors of standing seam, 5V and other metal rib panels. Applications include residential, commercial, industrial and agricultural profiles.

As a dedicated metal supplier, we have a large selection of aluminum and steel coils and sheets always in stock, and significantly more in our supply chain. Our state-of-the art machinery is designed and built to serve the specific needs of the fast-growing metal roofing market. We can slit and cut-to-length a variety of gauge and substrates up to 49" wide on very short notice. Most orders are processed between 1-3 days on average.

In 2023, to complement our metal roofing program, we added a full line of metal roofing accessories, including fasteners, standing seam clips, butyl tape and so on. We will continue to expand this line as our customers' needs dictate.

In late 2024, we installed a state-of-the-art RAS folding machine to offer custom trim to the local market. Whatever profile you need, we can probably make it. With the millions of pounds of readily available metal in our inventory, the work will be done fast and at the right price. Pick from our full catalog of standard profiles used for metal, shingle and tile roofing, or tailor each part to your specific needs.

A critical feature of our trim program is that it comes with a full engineering database that opens up a whole universe of options for our customers. Once we receive your request, we will create a customized quote with shop drawings for your approval. Once we get it back, it is reviewed and then sent wirelessly to our machines, eliminating the need to enter them manually. The system allows us (and you) to keep track of production, then stores the exact prints in your own catalog so that you can order the same part repeatedly without repeating the process. As we build up our program, customers will be able to place orders directly from the field from their smartphones, tablets or laptops.

Give us a call, send us an email, or come visit us in person. We look forward to hearing from you.

Solaclad® Coils & Sheets

Our product lines include the following:

- **Substrates:** 29, 26 & 24 ga Galvalume, and 0320 and 0400 aluminum;
- **Coatings:** Acrylic AZ55, PVDF, SMP and Polyester. Custom coatings are also available per spec.
- **Manufacturers & Brands:**
 - Sherwin-Williams (Valspar) Kynar® & WeatherXL®
 - Akzo Nobel Trinar® Ceram-a-Star® 1050
 - Continental / Rainbow coatings
- **Colors:**
 - 26 colors in Kynar
 - 13 colors in SMP
 - Custom color-matching available.
- **Widths:** 20", 27.50", 41-9/16", and 48" in coil and flat sheets; in-house custom slitting available.
- **Order minimums:** None
- **Service:** Incredibly fast quotations for quick decision making;
- **Lead Times:** Slitting and cut-to-length -processing time of 1-3 days on average

Solaclad® Coils & Sheets

SMP Colors

Available in 26 ga Grade 50 Galvalume

Selection

Over 40 colors in 26 and 24 gauge steel, and .0320 and 0400 aluminum, warranted and competitively priced.

Service

Time is money and our responses to your inquiries, orders, and deliveries are second-to-none.

Support

We work with our customers to help grow their business, not compete with them.

Florida Building Code Approved

All colors are direct deposit paint samples and are as close to actual colors as allowed by the printing process, but not exact matches. For actual metal samples, contact your Sabre Metals representative, distributor or fabricator.
